

**ADVANCED CLUTCH TECHNOLOGY (ACT) IS PLEASED TO
INTRODUCE ITS NEW SFI APPROVED RACE TWIN-DISC KIT
FOR DSM APPLICATIONS!**

The ACT Race twin-disc kit offers DSM enthusiasts a true race-ready complete direct bolt in clutch kit that requires absolutely no modifications. The ACT Race twin disc kit utilizes sintered iron discs for maximum holding capacity (770 lbs/ft of torque) and quick shifting while also offering twice the surface area for high heat capacity and long life. Each kit has an overall weight of 16 lbs as compared to the 29 lb stock kit (a 45% decrease in weight) and results in a very low moment of inertia. With ACT's ability to design and manufacture our own diaphragm springs, we were able to keep the pedal load to a minimal 20% increase over the stock pedal load.

All ACT Race twin-disc kits are dynamically balanced in house as an assembly for trouble free use.

DESCRIPTION	PART #	TORQUE CAP.	CLAMP LOAD INCREASE
ACT Race twin disc Kit for 6 bolt DSM's	T1RR-M01	770 ft/lb	39%
ACT Race twin disc Kit for 7 bolt DSM's	T1RR-M02	770 ft/lb	39%

ACT's Race twin disc kits are a perfect complement to an already expansive catalog of over 1200 performance clutch kits and components for more than 700 different applications.

ACT clutches deliver the maximum holding power by applying a series of sound engineering advancements to new (not rebuilt) components which maximizes load and reduces flex. The result is maximum torque capacity, long life and clean, fast shifting. The company's product line features clutches and forged flywheels for the most popular vehicles in the sport compact, domestic, and European car markets. ACT is headquartered in Lancaster, California.
